

Use formal language

In addition to the necessary information and documents, you must also use formal language in the invitation letter. You must show that you understand the Embassy's importance and you respect their authority.

The letter of invitation cannot use colloquial language or any local expressions or metaphors. The letter must be straightforward without any embellishments, so as to demonstrate a serious intent to visit the country and also return to your home country. To show how this could be phrased, we have included samples of invitation letters below.
